Subject: Bad River draft WQS

Hi Kathy,

Attached you will find Bad River's draft Water Quality Standards which we are submitting to you to review and comment on. I highlighted changes made from our 2006 WQS document in yellow. We are working on the Implementation Methods section, which we hope to have you review in the future. For now, we are going with EPA's subsistence fisher consumption rate of 142.4 g/day, but please note that we may edit this. We also plan to set nutrient criteria, however we do not feel that we currently have data to support this as of now. Thank you for all of your help!

Pam
